

SEMINARIO

CENTRO DE MODELAMIENTO MATEMÁTICO

EXPOSITOR

Dr. Maurizio Arienzo
President and CEO NovaWare Inc., New York, USA

TITULO

**"Recent News in Wireless Technologies and Machine-to-Machine (M2M)
Communications: Tales from the Trenches"**

ABSTRACT:

This talk will describe a number of projects and start-up companies that have been part of my personal mission over the last decade to bring wireless mobility to a variety of devices and systems. I will discuss and show examples of recent advances in wireless technologies, including connected devices and mobile device management, with specific reference to the increase in automation and connectivity in classrooms, automobiles and transportation.

Some of the problems associated with Bring Your Own Devices (BYOD), and an example of disaster recovery after Hurricane Sandy will help understand both the benefit and the challenges associated with mobile systems.

Lunes 08 de Julio del 2013 a las 15 : 00hrs, Sala Multimedia Sexto Piso.
