

SEMINARIO

MODELAMIENTO ESTOCÁSTICO

EXPOSITOR

Krzysztof Burdzy
University of Washington

TITULO

Statistics and philosophy of probability - six degrees of separation

Abstract:

I will discuss some topics from my book

"The search for certainty. On the clash of science and philosophy of probability."

My main claims are

- (i) The philosophy of probability is a complete intellectual failure.
- (ii) Frequency statistics has nothing in common with the frequency philosophy of probability of von Mises.
- (iii) Bayesian statistics has nothing in common with the subjective philosophy of probability of de Finetti.
- (iv) A few simple laws summarize well the science of probability.

Jueves 14 de Enero a las 16:00 hrs, Sala de Seminarios John Von Neumann-CMM, Séptimo Piso, Torre Norte, Beauchef 851.
